

Meet the latest **fuel saving technology:** **the SmartDriver**

With fuel costs consuming a large part of a fleet's budget, it makes sense to do whatever you can to save. That's why more and more companies are training their drivers to be **SmartDrivers**. **SmartDriver for Highway Trucking** is a professional drivers' course designed to help you save money on fuel and improve your bottom line. Your drivers will learn techniques that will help them get the most from their vehicle, their driving skills and themselves. And, a company can reduce its fuel consumption by 5-10% after participating in a driver training program.

SmartDriver training is a one-day course and sessions are available across Canada throughout the year.

Current sessions are
